• <https://assetstore.unity.com/packages/3d/animations/rifle-hipfire-mocap-animation-pack-308748>

***After purchasing this bundle, visit each linked package to claim them for free.

Technical Details

All Animations Humanoid

All Animations Root Motion and In-Place

New Rifle attachment on the "RightHandMiddle1" finger bone, and all Animations updated to use it.

The "RightHandMiddle1" articulates the position of the Rifle in different poses without breaking the wrist and replacing the need for the custom "hand_r_wep" bone as before.

Be sure to read the included docs on Rifle Attachment and Placement:

[Mocap Online - Unity Rifle Attachment](#)

Root Motion and In-Place

Reference Root Motion

Includes documents with Tips on Avatars and Avatar Adjustments, and "Reference" root motion.

[Mocap Online - Unity Animation Notes](#)

All animations are .fbx format, standard fbx bone names.

M4_Rifle_01 - A matching fully textured Rifle has been included as a separate asset .fbx file. Parenting or constraining it to the "RightHandMiddle1" finger bone in the right hand will place and animate it correctly.
